Industrial and Commercial.

MINE, MILL AND RAILROAD.

The month of October records a further addition to the production of pig iron in the United States. The weekly output is now larger than at any time since May, 1893, and only 22,685 tons below the maximum output in that year. The average production of the furnaces has increased as shown by the fact that on May 1, 1893, the output of 251 furnaces was 181,551 tons, or an average of 723 tons, while the 181 furnaces now in blast have an average output of 877 tons, an increase of over 21 per cent. The number of furnaces now in blast shows an increase of nine for the month, but an increase of only 7,731 tons in the weekly production. The iron trade is considered to be the barometer of general business and in this respect it shows a remarkable recovery from the low point of depression in the summer. Since June 1 the weekly production has increased from 62,517 tons to 158,866 tons. an increase of 96,349 tons, or 154 per cent., the number of furnaces in blast having increased from 88 on June 1 to 181 on Nov. 1. The remarkable feature of this large increase is that it has been coincident with a decline in prices and disturbance of the markets of all kinds of iron anl steel by the tinkering with the tariff. The consumption of charcoal and pig iron has been about equal to the production, while the consumption of anthracite has been very heavy, having reduced stocks about 20,000 tons, notwithstanding the more active production. These figures indicate that the iron trade is in a healthy condition. Prices are on a very low basis, but on the other hand cost of production has been proportionately reduced, and any change must now be in the direction of higher prices. It is known that large orders for material are being held back, and the placing of, say, one-quarter of the same would give a decided impetus to the trade. It does not appear probable to the Commercial Advertiser, from which these figures are taken, that these orders can be held back much longer, as the material will be needed for use in the spring. The necessities of the railroads alone make a larger total, and makers confidently look for an active demand for structural material. The crisis in the iron trade was passed some time since, and the tendency now is in the direction of improvement, which, however, will be gradual but progres-

The scarcity of empty cars continues. To a considerable extent this is due to the great number of loaded cars standing on the side-tracks and switches of the various roads. The fact that the operators are unable to get a sufficient supply of cars is really the reason for the semi-restriction which is reported. Were cars abundant there is no telling how much anthracite might not be mined now that it has been decided to work on full time. The Engineering and Mining Journal thinks it is, perhaps, a fortunate thing for the operators that such a state of affairs exists, for a full tonnage this month would more than ever diminish the chances of seeing

The famous Jeddo tunnel is about completed. The contractors, Scott & King, have been pushing the work very quietly, and, except the men engaged at the work, no one knew how they were progressing until last night. It is now learned that the blast which, it is expected, will break the division of rock and release the water, is now in readiness to be set off. It is expected that this will be done this morning. Last night the bore hole, which was driven from the surface to meet the water-way and through which the wires to discharge the dynamite are to be run, was completed. The lines, as given by Engineer Palmer, came out within an inch of the point where he had made his locations. The final stroke will finish one of the greatest feats of engineering ever attempted in the history of coal mining.

The detailed report of the operation and output of the Connellsville coke region for the week ended Saturday. Nov. 3, shows 14,024 active and 3,550 idle ovens, with a total estimated production of 139,588 tons. Compared with the production of the previous week, this was a decrease of 2,234 tons. In the active list there was a net decrease of 130 ovens. This lessening of the active list was responsible for the setback in The shipment for the week aggregated 7,427 cars, consigned as follows: To Pittsburg and river tipples, 2.342 cars; to points west of Pittsburg. 3.750 cars; to points east of Connellsville, 1,335 cars. Compared with the shipments of the previous week, this was a decrease of fifty-five cars. The circular prices of coke are as follows: Furnace coke, \$1; foundry coke, \$1.15; crushed coke, \$1.40; all per ton of 2,000 pounds on board cars at ovens.

In less than a year, if the present plans carry. Baltimore will be connected with Washington and Gettysburg by electric rallways. The company that will build the road to Washington has advertised for bids for constructing sixteen miles of double track road from

HOW THE PUBLIC IS IMPOSED UPON

BEWARE OF FRAUDS

For the Sake of Profit They Will

Sacrifica Principle, Health, Etc.

Unscrupulous dealers are trying to sell or-dinary Glauber Salt or a mixture of Seidlitz Powder as "Artificial Carlabad Salt," "Spru-dei Salt," "German Salt" or "Improved Carl-bad Salt," and under other similar names. The Natural Remedies of Carlsbad can not

"What Nature makes, man can not im-prove upon." Artificial made wines will never replace the natural juice of the grapes. Neither can the natural waters of Carlsbad nor the Carlsbad Sprudel Salt be replaced by the cheap substitutes offered to a guileless public for the sake of the larger profit made

thereon by these unscrupulous dealers.

No one would buy artificial wines know-ingly. Why buy the imitation of the Carlsingly. Why buy the imitation of the Carlshad products when your health is at stake?

The Carlshad Sprudel Waters are a specific for all diseases of the stomach, liver and kidneys, and have been used with great benefit by hundreds of thousands of people. The Carlshad Sprudel Salt, which is evaporated from the Sprudel Water at Carlshad, is an ex-

from the Sprudel Water at Carlsbad, is an ex-cellent Aperient, Laxative and Diaretic; is an alterative and eliminative remedy, which dis-solves tenacious bile, aliays irritation, and removes obstruction by aiding nature, and not by sudden and excessive irritation, as most cathartics do. Use the imported Carls-bad waters or if it is not convenient to use the waters or when a more decided laxative effect is desired, use the Carlsbad Sprudsl Salt.

Insist upon the genuine, which is imported direct from Carisbad, and must have the signature of Eisner & Mendelson Co., Sole Agents for the United States, 152 and 154 Fr aklin street, New York, on every bottle.

Washington to Laurel. The entire line is to be completed within a year. The specifications provide that the road shall be laid with 80-pound steel rails and shall be so ballasted and constructed as to permit electric trains to attain a speed of sixty miles and hour.

Carnegie's big steel plant at Homestead may soon add another department and make guns for the government. It is said that the company will expend \$500,000 upon the plant on receiving the assurance that it will get the contracts. In his annual report Commodore Sampson, chief of the naval ordnance bureau, calls for \$500,000 to be expended in beginning to provide armament for the steamers registered under the provisions of the subsidy acts, which make them available for use by the United States as transports or cruisers. In case such vessels as the New York. Paris or the new St. Louis should be called into service it would require many months to provide batteries for them. No guns are now available fo the purpose and none are authorized.

Last Saturday evening, says th Hazleton Standard, the last shovel fu of clay was removed from the No. Wharton stripping at Tresckow. Die & Mantz had a steam shovel workin there for the past year in which tim many thousand yards of clay wer removed. When the Lehigh and Wilker Barre company opened up the vein t remove some of the coal they discovered it to be a flat failure, the coal be ing but two feet thick in many places What coal is stripped will be removed but no further outlay of cash will be made there. The steam shovel which has been engaged in the work will likel be abandoned for the winter.

MINOR INDUSTRIAL NOTES:

Nickel Plate net earnings decrease \$60,265 in the quarter ending Sept. 30. New York Central gross earnings for October fell off \$514,064, and for th year to date, \$4,755,047.

The Gautier mills, at Johnstow started on extra runs Monday nigh giving employment to 300 additions On Nov. 14 the passenger departmen

of the Central Traffic association will hold a meeting in Chicago to fix up holiday rates. J. W. Morris has retired as general

road master of the New York, Pennsylvania and Ohio, and the office has een abolished. There is talk in New York that the

Chesapeake and Ohio will make a passenger traffic arrangement with the Jersey Central. Returns of gross earnings of 107 rail-

roads for October show an average de crease of 21 per cent, compared with those of October, 1893. Railroad earnings so far as reported

for October are 43 per cent, less than in October, 1893, and 1 1-3 per cent. beow those of October, 1892. For ten months ended Oct. 31, 1894. 108 roads, with a mileage of 90,152 miles

show decreases equivalent to 12.2 per

cent. as against results for same period The Peorla and Eastern has this week distributed five miles of new steel rail, 67 pounds to the yard, to be laid on the western division, between Cov-

Ington and Danville. Earnings of the Chicago, Milwaukee and St. Paul for the first week in November were \$597,554, a decrease of \$188,607, compared with the correspondng week of last year,

King & Co., are making rapid headway at the Drifton No. 2 stripping. There is an immense body of coal to b unearthed. It will be one of the largest strippings in the coal regions.

A circular announces that the office of coal traffic manager of the Wheeling and Lake Erie has been abolished, and W. H. Vance has been appointed general coal freight agent, with headquarters at Toledo.

The Beaver Brook colliery is under going radical repairs before the cold weather sets in. A force of carpenters are at work closing large holes on the side of the structure and the roof is also receiving attention.

While prices for iron and steel shapes for Bessemer pig iron and steel billets are practically steady, there was another net advance last week in prices for wheat and lard, and coffee and sugar advanced fractionally also.

Freight men are not confident that the order to advance east bound rates Monday next will be carried out, as the lake lines are still in the market for business and show no inclination to advance the part water and rail rates.

The proposed rock tunnel to be driven in No. 1 slope, Coleraine colliery, in search of the Buck mountain vein, will in all probability not begin before Jan. 1, although the bids now being received may prompt the commencement by

During the month of October 71.387 cars were handled to and from the different connections of the Lehigh Valley at Buffalo, which is an increase of a little over 16 per cent, as compared with the corresponding period of last

C. W. Bucholz, who resigned two years ago as chief engineer of the Erie lines, has returned to the road and accepted his old position, with headquarters at New York. A. Mordecal comes to Cleveland with the title of assistant chief engineer of the Erle lines.

An exceedingly large screen has been substituted in Coleraine breaker to take the place of two small ones heretofore in use. The kind of coal made by it is pea, and the large quantity prepared daily proves the one far more practicable than two, therefore the change. Bank clearings at 75 cities through out the United States last week amounted to \$950,600,000, or 2-5 per cent. more than in the previous week, 2 per cent. more than in the first week of November, 1893, and only 20 per cent. smaller

When Baby was sick, we gave her Custoria. When she was a Child, she cried for Castoria, When she became Miss, she clung to Castoria. When she had Children, she gave them Castoria

larity was the result of heavy selling for London account, and the total sales for this account was fully 15,000 shares, the offerings being well taken, and before 11 o'clock the whole list was on the advance once more. The rise induced profit taking and the early gains were generally lost. Late in the day the active traders, usually arrayed on the bear side of the account, discovered heavy liquidations by an operator responsible for the big rise in sugar and immediately the bears began to increase in their short lines. As a result the closing was barely steady, with net changes showing losses of ¼ to 1¼ per cent, in the active list. Sales 280,000 shares.

The range of today's prices for the active stocks of the New York stock market are given below. The quotations are furnished The Tribune by G. du B. Dimmick, manager for William Linn, Allen & Co., stock brokers, 412 Spruce street, Scran-

FLOUR

TO OUR PATRONS: Washburn-Crosby Co. wish to assure their many pat-rons that they will this year hold to their usual custom of milling STRICTLY OLD WHEAT until the new crop is fully cured. New wheat is now upon the market, and owing to the excessively dry weather many millers are of the opinion that it is already cured, and in proper condition for milling. Washburn-Crosby Co. will take no risks, and will allow the new wheat fully three

months to mature before grinding.

This careful attention to every detail of milling has placed Washburn-Crosby Co.'s flour far above other
